

33 KING WILLIAM ST – FOYER UPGRADE & END OF TRIP FACILITY**Project Scope: Refurbishment**

The foyer upgrade was the first of many projects for this client and involved the construction of a new ceiling with detailed bulkheads and lighting, and the re-tiling of both floor and ceiling.

A subsequent project involved creating a purpose-built facility to service bicycle commuters, containing a secure bike storage area with a bicycle repair station, locker areas, shower rooms and toilets.
