

AUSTRALIA POST GLENSIDE

Project Scope: Australia Post Glenside

This project involved the commercial fit out of the existing retail space to Australia Post standards and specific requirements including the provision of all linings, floor coverings and adjustment to structural steel to account for the new entry way. Mykra installed an automatic door to the entry way as well as aluminium to the shopfront along with joinery, Billi unit and supply and installation of security systems. Due to fixed open dates of the retail store, it was imperative that the project remained on time according to the programme so all works were completed when scheduled.
