

COLONEL LIGHT GARDENS BOWLING CLUB TOILET RENOVATIONS

Project Scope: Colonel Light Gardens Bowling Club Toilet Renovations

This project consisted of the refurbishment to the existing male and female toilet facilities to improve the amenities for the Bowling Club. Mykra also added an extra toilet cubicle and unisex access toilet in the female toilet and an extra toilet cubicle in the male toilet with an extra sink. The improvement to the front entry with an access ramp has made this facility disabled friendly, while the site has been made safe with the removal of asbestos. Throughout the project, there was minimal disruption to the operation of the facilities.
