

GOOD SHEPHERD LUTHERAN SCHOOL - WEST WING GENERAL LEARNING AREAS

Project Scope: Good Shepherd Lutheran School West Wing General Learning Areas

The Good Shepherd Lutheran School required a variety of minor works to upgrade their current facilities in the General Learning Areas (GLSs) in the West Wing. This included enclosure of existing porches, new aluminium sliding partition walls between the GLAs, cladding the existing masonry walls and new ductless AC units. New carpet to these spaces was also included. Challenges included having tight construction schedules mainly working in the school holidays, as well as variations in floor levels. These were overcome during construction.

ADDITIONAL INFORMATION

Client	Good Shepherd Lutheran School
Completed	2019
Project Value	\$250,000
