

HARLEY DENTAL

Project Scope: Harley Dental

This project included the conversion and substantial refurbishment of a 3-level existing locally heritage listed building into a dental clinic including basement.

The basement refurbishment works included a laboratory, administration space and store room.

The ground floor works included creating six dental surgery rooms, sterilisation areas, reception and waiting rooms.

The first floor works included a cone beam room, general office space and boardroom.

Intricacies of the works included re-engineering the flooring structure to allow for the weight of all the dental equipment, specifically the dental chairs.
