

## MCDONALD'S MURRAY BRIDGE - DRIVE-THRU LANE REFURBISHMENT

### Project Scope: McDonald's Murray Bridge Drive-Thru Lane Refurbishment

This project involved reconfiguring the existing single lane drive-thru facility, extending the premises by demolishing the existing pavement and loading bay, to create a new dual lane drive-thru access including new menu boards and canopies to suit the new layout, including electrical services. This project was carried out while the drive-thru remained operational and involved Mykra working in conjunction with McDonald's Australia and the franchisee to modify the scope, ensuring the drive-thru would remain operational with minimal impact on the store.

## ADDITIONAL INFORMATION

<b>Client</b>	McDonald's Australia
<b>Project Value</b>	\$120,000
<b>Completed</b>	2018
