

MCDONALD'S WOODVILLE – CONSTRUCTION & REFURBISHMENT

Projects Scope: Complete construction

This McDonald's is the first one in South Australia to adopt this new design. The project involved structural steel and precast construction with full height glazing, allowing the architectural dining area to be enjoyed from the outside of the building. It also includes a large commercial kitchen area and dining area with seating for over 100 customers, an internal air-conditioned playland and a dual lane drive through. Construction of a heavy-duty black concrete pavement in the car park with underground storm water detention tank and sewer pumping stations.
