

NRAH PATHOLOGY ROOM RECONFIGURATION

Project Scope: nRAH Pathology Room Reconfiguration

This project was awarded to Mykra to reconfigure the existing Pathology Room to allow for a new compactus to be installed whilst upgrading the security of the area. As this was classed as a laboratory, Mykra had to take great care whilst completing works ensuring we following the Infection Control Protocol and protect the existing machines from damage. Once the old compactus was removed and the new one installed, trades only had to make good to the flooring, ceilings and linings, and install an improved security gate with keypad to complete the project. The project ran smoothly and finished earlier than programmed.

ADDITIONAL INFORMATION

Client	Spotless
Project Value	\$60,000
Completed	2020
