

PARA HILLS HIGH SCHOOL STEM WORKS

Project Scope: Para Hills High School STEM Works

This project involved the construction of a new 675m² Performing Art Centre including installation of a 170+ retractable seats, art lab, workshop, studio, changerooms, toilets and studio area.

Mykra also carried out the refurbishment of the existing gym, modification of the entrance to Building 1, construction of a new 54m² shed including all associated slabs/footings, service connections and site works as well as demolition of the existing Performing Art Centre on completion of the newly constructed building.
