

STOCKLAND PORT ADELAIDE DISTRIBUTION CENTRE

Project Scope: Stockland Port Adelaide Distribution Centre

Mykra were engaged to complete structural rectification works at a distribution warehouse for Stockland Property Management. Works included replacement of the complete external wall to the building and roof cladding; repairs to internal concrete walls and structural supporting columns; repairs to bitumen pavements and general damage caused by operational equipment and repairs to the building lighting and power to meet current building standards.

Challenges included site safety for trades working and operating around moving equipment on an operational site. Mykra worked closely with the client to ensure rectification works were completed to high standard, whilst meeting clients requirements with budget and timeframe.
