

### WALKERVILLE OVAL MULTI-PURPOSE SHED

#### **Project Scope: Walkerville Oval Multi-Purpose Shed Construction**

The Town of Walkerville identified buildings that were in poor condition and the untidy land areas which were also badly utilised. The previous sheds and surrounds had been in use for more than 20 years. This resulted in the need to clear the area and rebuild a purpose-built shed to house all of the current resources and provide additional undercover secure storage for small equipment and supplies. The design and detailing of the new shed and surrounding areas was undertaken in consultation with the client to provide a much more efficient and user friendly space.
